

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

As the causes of death acute diseases of the stomach and intestines claimed 571 victims or 72 per cent. Of this number there were 188 deaths (23.7 per cent) under 1 year of age.

The mortality from other diseases was as follows: Measles, 7; scarlet fever, 8; diphtheria and croup, 5; enteric fever, 2; puerperal fever, 1; phthisis pulmonalis, 73; pneumonia, 31; all other diseases, 289.

Comparing the health report for August with a corresponding week in April, the enormous infant mortality can be better appreciated. Thus of a total mortality of 671 in April, only 172 (25.6 per cent) were in infants under 1 year of age. The heat in the city of Berlin during the month of August has not been intense, so it is difficult to ascribe the high infant mortality to this cause. It naturally causes the health authorities considerable anxiety.

Respectfully,

JOSEPH B. GREENE,  
*Passed Assistant Surgeon, U. S. M. H. S.*

The SURGEON-GENERAL,  
*U. S. Marine-Hospital Service.*

*Requirements regarding vaccination of American citizens and residents returning from Europe in steerage by reason of lack of accommodations in cabin.*

The great fire among the shipping in New York and the chartering of certain vessels by the German Government for conveying troops to China made it impossible for many returning citizens and residents of the United States to secure cabin passage and compelled them to return in the steerage.

It was brought to the attention of the Treasury Department by the United States consul at Bremen that compulsory vaccination of such passengers was an unnecessary hardship, and for this reason the following cablegram was sent by the State Department to the United States consul at Bremen at the request of the honorable the Secretary of the Treasury: "Paragraph 4, page 28, Treasury Regulations, November 13, 1899, regarding vaccination of all steerage passengers, is waived temporarily with regard to returning citizens or residents of the United States obliged by scarcity of room to take steerage passage, unless known to have been exposed to smallpox."

#### GUATEMALA.

##### *Report from Livingston—Fruit port.*

LIVINGSTON, GUATEMALA, *August 28, 1900.*

SIR: I have the honor to submit my report for the week ended August 28:

The health of this port continues very good. Aside from chronic diseases to be found everywhere, we have nothing more serious than the nonpernicious forms of malaria. The entire absence of typhoid is noteworthy. No ships inspected this week. One death reported, male adult, gunshot wound of the chest.

Respectfully,

SAMUEL HARRIS BACKUS,  
*Acting Assistant Surgeon, U. S. M. H. S.*

The SURGEON-GENERAL,  
*U. S. Marine-Hospital Service.*
